

Book Review for *The Path of the Most High*

by Linda from GA

In my opinion, *The Path of the Most High* is an excellent companion to have as a study guide. In addition, it gives answers through Scripture regarding the foundation of Christianity. This book is not only for those who already read the Turah (Scrolls of M'shih - Moses), but for everyone, Messianics, Christians, Atheists and whoever will read.

Why do you believe the way you do? What does Scripture really say regarding the birth of Jesus Crist (aka Yeshua) and the virgin birth? This book compares the original language of scripture to the English part of scripture.

Most westerners (Americans) quote “we are and speak English,” so they believe every word of their English Scripture is verbatim from the original language. That is so far from the truth. Furthermore, our English Scriptures are taken from the Greek language, yet we do not speak Greek, and few people question the validity of Greek manuscripts.

This book invokes you to rethink everything that you were taught, along with the foundation of the New Testament. It invokes you to study. Don't simply read the Scriptures, but also search out, ask questions and re-adjust the way you looked at them.

Is this really your own belief or is it borrowed from your parents, grandparents, friends and the churches, synagogues and mosques? Know for yourself the truth of what the Most High really intended for us. Know how to really walk “The Path of the Most High.”

Sha'ul and Alish'bai did a great job of providing important information, footnotes and key points for the reader. Sha'ul has a lot of background in studying Scripture and he is out to make known to the world the real intent of the Scriptures through this book. I believe, in my opinion, that he and his wife did an excellent job.

The price is excellent and I highly recommend this book for everyone.
